

PUBLIC NOTICE

December 5, 2020

Smith River, CA. As a precautionary measure the Tolowa Dee-ni' Nation Tribal Council agreed to close the physical offices of the Tribal Government operations until Monday December 21, 2020. Recently we have had multiple governmental employees test positive to the COVID19 Virus.

Contact tracing has been performed, and those with second or third-party exposure to known positive cases have been identified. They are currently isolating and will be required to test negative before returning to work.

All staff will be continuing to work from home, and there will be no reduction in pay. Staff will be contacted by their supervisors to facilitate this new 100% remote-work status. Critical services for Tribal Members will continue through electronic means, including email, telephone, and other telecommunication services. This closure is an effort to curb the possible spread of exposure throughout the organization.

We will also be taking the necessary steps to sanitize and clean our facilities and equipment. Staff will also be required to test negative for the COVID19 virus prior to the returning to on-site operations.

Please stay safe during these trying times.
